

POND A16 RECONFIGURED POND

Draft June 5, 2007

South Bay Salt Pond
Restoration Project

figure 2

Alviso Pond A16 Restoration
Restoration Site Plan

Restoration Area: 240 acres

Number of Cells: 3

Public Access: Viewing platform on south levee (40'x40') and trail/interpretive display on northeast levee

Estimated Cost (construction & adaptive management): \$5.5 million

Issues: Bird usage, California Gulls, Vegetation control, Water quality

Applied Studies Questions: 1) will reconfigured ponds maintain numbers and increase reproductive success of birds, and 2) will landside public access significantly affect birds on short or long timescales?
