

POND A6 RESTORATION

Draft June 5, 2007

PWA Ref# 1750 phase1\basemap\concept plans\pondA6_4-27-07.dxf

Restoration Area: 360 acres
 Number of breaches: 4
 Public Access: None
 Estimated Cost (construction & adaptive management): \$1.5 million
 Issues: California Gulls, Preservation of Pond A9 levee, Sediment dynamics
 Applied Studies Questions: 1) will gulls, ravens, and crows adversely affect nesting birds in managed ponds, and 2) to what extent do wave breaks increase salt march sedimentation rates and ditch blocks enhance re-establishment of marsh channel networks?
